

MARINE MICROORGANISMS AND THEIR CONTRIBUTION TO GLOBAL BIOGEOCHEMICAL CYCLES

Symposium in honour of Professor Lucas Stal

Scientific program

10:00 Coffee

10:30 David Paterson (University of St. Andrews, Scotland)

“Mud, microbes and mucilage”

11:00 Francisco Rodríguez-Valera (Universidad Miguel Hernández, Alicante, Spain)

“The long arm of genomics in marine microbiology”

11:30 Silvia G. Acinas (ICM-CSIC, Barcelona, Spain)

“The Global Oceanic Microbiome”

12:00 Lunch

13:00 Ina Severin (Leibniz-IGB, Berlin, Germany)

“N₂ fixation in microbial mats”

13:30 Annick Wilmotte (Université de Liège , Liège, Belgium)

“Antarctic cyanobacteria: from diversity to genomics”

14:00 Henk Bolhuis (NIOZ, Texel, Netherlands)

“Molecular ecology of coastal microbial mats”

Valedictory lecture

14:30 Lucas Stal:

“About cyanos: 40 years later”

Personal address

15:30 Jaap Sinninghe Damsté (NIOZ)

15:40 Jef Huisman (UvA)

16:00 Drinks

Organized by

Date: 30 June 2017

Venue: Doelenzaal, Singel 425, Amsterdam

Participation free, registration required

Registration: p.thiery-vanderbij@uva.nl

Organizing committee:

Henk Bolhuis, Gerard Muyzer, Jef Huisman
